Oak Harbor, OH. 43449

Dear Mr. Wadsworth:

In July of 2013 the Sand Beach Conservancy District Board accepted two bids submitted by you: one for a drip cover at \$200, and a second for relocation of float switches at a cost of \$750. You were paid to complete these services with check #1273 issued for a total of \$950.

As of this date, the float switches have not been relocated to the remote location at the gate valve north of the pump. As agreed on, the float switches need to be installed in a conduit to prevent ice damage and at the proper elevation. The SBCD Board would like this service completed before the ground freezes this fall.

If you have any questions or concerns, please contact me on my cell.

Thank you for your cooperation in this matter.

Sincerely,

Tim Clapp
President SBCD
